Summary

Third-year Computer Science and Engineering undergraduate at Southeast University with a strong foundation in C++, Data Structures & Algorithms, and core CS fundamentals. Hands-on experience with neural network architectures (ANN, CNN, RNN/LSTM) and practical machine learning workflows, including model implementation, evaluation, and database-backed applications. Currently deepening expertise in deep learning and computer vision, with a long-term goal of contributing to applied AI research. Maintains a 4.0 CGPA and is eager to apply strong analytical skills to research-driven, real-world AI problems.

Skills

Programming:	Python | C | C++ | Java
AI / ML:	Artificial Neural Networks (ANN) | CNN | RNN/LSTM | Machine Learning Fundamentals | Prompt Engineering
Data & Tools:	MySQL | Data Structures & Algorithms | Git & GitHub | OOP
Soft Skills:	Critical Thinking | Research Aptitude | Teamwork | Time Management | Adaptability

Projects

Heart Failure Disease Prediction *Python, Scikit-learn*

- Implemented and compared five machine learning models – Logistic Regression, Random Forest, SVM, KNN, and ANN – for binary classification of heart failure risk.
- Conducted data preprocessing, feature evaluation, and performance comparison across models to identify the most effective predictor.

Movie Ticket Management System *JavaFX, MySQL*

github.com/hasan2733/movie_ticket_management_system

- Built a desktop application automating movie browsing, ticket booking, and booking management, with a dedicated admin panel for managing movies, showtimes, and bookings.
- Applied Java OOP principles and relational database integration to deliver a functional, user-friendly system.

BMI and BMR Calculator *Java, Android Studio, Firebase*

github.com/hasan2733/BMI_and_BMR_calculator_Project

- Developed an Android health-tracking app computing BMI, BMR, and ideal weight range with real-time categorization and personalized diet suggestions.
- Integrated Firebase Authentication and Realtime Database for secure user data synchronization.

Education

Southeast University *Nov 2023 – Nov 2027 (Expected)*

BSc in Computer Science and Engineering | CGPA: 4.00

Major General Mahmudul Hasan Adarsha College *2022*

HSC, Science | GPA: 5.00/5.00

Bindubashini Govt. Boys' High School *2020*

SSC, Science | GPA: 5.00/5.00

Key Achievements

- Awarded a 100% merit-based scholarship for academic excellence.
- Maintaining a perfect 4.00 CGPA throughout the undergraduate program.

Certifications

- AI+ Prompt Engineer Level 1™
- Database Design Fundamentals for Software Engineers
- Introduction to Human-Computer Interaction
- Data Science Math Skills
- Introduction to Web Development with HTML, CSS, JavaScript
- Getting Started with Git and GitHub

Languages

Bengali (Native) | English (Intermediate)
